TECTONOPHYSICS—Volume 226–No. 1/4

Special Issue

THE ORIGIN OF SEDIMENTARY BASINS: INFERENCES FROM QUANTITATIVE MODELLING AND BASIN ANALYSIS

Papers presented at the ILP Task Force "Origin of Sedimentary Basins" meeting in Mátraháza (Pannonian Basin, Hungary), 26 September–2 October 1991

Edited by

S. CLOETINGH

Department of Sedimentary Geology, Institute of Earth Sciences, Free University, De Boelelaan 1085, 1081 HV Amsterdam, The Netherlands

W. SASSI

Institut Français du Pétrole, 1–4 Avenue de Bois-Preau, 92600 Rueil-Malmaison, France

and

F. HORVÁTH

Lorand Eötvös University, Geophysical Department, Ludovika tér 2, H-1083 Budapest, Hungary

Publication No. 203 of the International Lithosphere Program

CONTENTS

The origin of sedimentary basins: state of the art and first results of the task force
S. Cloetingh, W. Sassi and F. Horváth vii

Theme 1: Stress and basin formation

Stresses in the lithosphere and sedimentary basin formation
M.D. Zoback, R.A. Stephenson, S. Cloetingh, B.T. Larsen, B. Van Hoorn, A. Robinson, F. Horváth, C. Puigdefabregas and Z. Ben-Avraham 1

Tectonic–stratigraphic record of paleostress time changes in the Oligocene basins of the Provence, southern France
J.-C. Hippolyte, J. Angelier, F. Bergerat, D. Nury and G. Guieu 15

Intraplate stresses and the subsidence history of the Sirte Basin (Libya)
F. van der Meer and S. Cloetingh 37

Continental lithosphere folding in Central Asia (Part I): constraints from geological observations
A.M. Nikishin, S. Cloetingh, L.I. Lobkovsky, E.B. Burov and A.C. Lankreijer 59

Continental lithosphere folding in Central Asia (Part II): constraints from gravity and topography
E.B. Burov, L.I. Lobkovsky, S. Cloetingh and A.M. Nikishin 73

Theme 2: Rheology and basin formation

Lithosphere rheology and sedimentary basins
J.P. Vilotte, J. Melosh, W. Sassi and G. Ranalli 89

Modelling of structural complexity in sedimentary basins: the role of pre-existing faults in thrust tectonics
W. Sassi, B. Colletta, P. Balé and T. Paquereau 97

Measurement and characterisation of spatial distributions of fractures
P.A. Gillespie, C.B. Howard, J.J. Walsh and J. Watterson 113

Geomechanics of the South Furious field. An integrated approach towards solving complex structural geological problems, including analogue and finite-element modelling
D.A. Nieuwland and J.V. Walters 143

Finite-element analyses of thrust tectonics: computer simulation of detachment phase and development of thrust faults
G. Mäkel and J. Walters 167

A rheological model of a fractured solid
V. Lyakhovsky, Y. Podladchikov and A. Poliakov 187

Numerical analysis of how sedimentation and redistribution of surficial sediments affects salt diapirism
A.N.B. Poliakov, R. van Balen, Yu. Podladchikov, B. Daudre, S. Cloetingh and C. Talbot 199

Theme 3: Deeper lithospheric processes and near- surface tectonics

Relationship between deeper lithospheric processes and near-surface tectonics of sedimentary basins
G. Quinlan, J. Walsh, J. Skogseid, W. Sassi, S. Cloetingh, L. Lobkovsky, C. Bois, H. Stel and E. Banda 217

Initiation and evolution of the Oligo-Miocene rift basins of southwestern Europe: contribution of deep seismic reflection profiling
C. Bois 227

Modelling of piggyback-basin stratigraphy: record of tectonic evolution
R. Zoetemeijer, S. Cloetingh, W. Sassi and F. Roure 253

Deformation and metamorphism associated with crustal rifting: the Permian to Liassic evolution of the Lake Lugano–Lake Como area (Southern Alps)
G. Bertotti, G.B. Siletto and M.I. Spalla 271

Anorogenic granites, magmatic underplating and the origin of intracratonic basins in a non-extensional setting
H. Stel, S. Cloetingh, M. Heeremans and P. van der Beek 285

Quantitative subsidence analysis of the Western Canada foreland basin with implications for short-term facies changes
T. Peper 301

The northern edge of the Gulf of Elat
Z. Ben-Avraham and G. Tibor 319

Natural laboratories: The Pannonian basin and surrounding areas

Towards a mechanical model for the formation of the Pannonian basin
F. Horváth 333

Discussion of origins of hinterland basins to the Rif–Betic Cordillera and Carpathians
C.K. Morley 359

Neogene sequences in the Pannonian basin, Hungary
I. Csató 377

Late Tertiary paleogeographic evolution of the Western Carpathians
M. Kováč, A. Nagymarosy, J. Soták and K. Šutovská 401

Deep crustal structure beneath the central and inner West Carpathians
Č. Tomek 417

Paleogene retroarc flexural basin beneath the Neogene Pannonian Basin: a geodynamic model
G. Tari, T. Báldi and M. Báldi-Beke 433

The Szolnok unit and its probable paleogeographic position
A. Nagymarosy and M. Bâldi-Beke 457

The Pieniny Klippen Belt in the Western Carpathians of northeastern Slovakia: structural evidence for transpression
L. Ratschbacher, W. Frisch, H.-G. Linzer, B. Sperner, M. Meschede, K. Decker, M. Nemčok, J. Nemčok and R. Grygar 471

Early Miocene basin evolution in northern Hungary: tectonics and eustasy
O. Sztanó and G. Tari 485

Eoalpine to Neoalpine magmatic and metamorphic processes in the northwestern Vardar Zone, the easternmost Periadriatic Zone and the southwestern Pannonian Basin
J. Pamić 503
